SKILLS

Languages -	C++, C, Python, Java, JavaScript
Web Dev Tools -	HTML, CSS, React js, Node js, Express js
Database -	MySQL, MongoDB
Tools -	Git, GitHub, Linux, VsCode

PROJECTS

B-Donate (Blood-Donation Site)

[Repo Link](#)

- Created a user-friendly Blood Dnation website using **HTML, CSS, and JavaScript**.
- Used **JSON-server API** calls for efficient backend data management, promote efficient storage and retrieval of donor and recipient information.
- Designed a Profile page for both Donner and recipients, and Details page to see the Donors list.

Homeify (Clone of Pepperfry.com)

[Live Link](#)

- Developed Homeify a clone of Pepperfry.com using the MERN stack, with a responsive frontend designed using **Tailwind CSS, React.js, and Material UI**.
- Implemented robust backend functionality using **Node.js** and **Express.js**, seamlessly integrated with **MongoDB** for efficient data storage and retrieval.
- Added features for browsing products, creating accounts, adding items to a cart, and making purchases.

UPSKILLING

MERN Stack - Prelabs [Credential](#)

Jun 2023 - Jul 2023

Completed MERN Stack Course, gained Knowledge in web development tools. Built a Blood Donation Website and a Pepperfry.com clone using **HTML/CSS/JS** and **MERN Stack**, respectively.

ACHIVEMENTS

1st Runners Up in Trithon Hackathon (Nov 2023)
